SUMMARY

Had first contact with programming during bachelor's and delve even deeper into IT during master's using computational biology tools. After graduating, learned web development with online courses and trainings for 2 years before getting first job in the area as an information system programmer. The job required working reviewing and maintaining code as well as creating project's processes using javascript in a low-code platform. Nowadays, have more than 1 year of work experience as a programmer and continues to study, now partaking a web development co-op diploma program.

SKILLS

- HTML
- CSS
